## Projects

---

- Society Management System (Academic Project)

In this project can manage all query for society residence related to manage all types bill like maintenance bill, water bill, electricity bill. and raise a complaint against society member any query related problem. and user need plumber, electrician and etc to this system can provides this feature to contact direct society secretary to managing problems and solve this. in this system provides feature security guard to manage entry and exit data of persons who come in society

- Background Removal (Desktop)

Working as intern in this project you can easily remove the image background. also in this project you can select folder and it can remove all image background which is available in your folder.

If you have any problem to use and find any problem than you can easily contact us using contactus form. sometimes we need to remove background of image for our project or some e-commerce company also need to remove image background for selling things that time image with clear background attracts customer so it's helpful.

- Wallet (Website)

This is online wallet website to manage money transfer. Its like mini banking system. It provides history of money transferred and received amount, add money to wallet Its like a gpay and paytm send money and received money using mobile number. and its provides all transaction history.

- Employee Management System (Live Project Website)

In this project can manage all employee Data like salary, rating, position and view daily task of employee to handle projects status and their due date. this system provides some features are employee leaves, own profile to see their technical rating, salary etc. employee registration, active and deactivate features. and showing all details of employee.

- Urban Service (Website)

In this website can electrician, plumber, car showroom etc store can share their contact number to contact them if need some requirements like user can need requirement of electrician so user can direct search nearest electrician or search category wise what type of services they needed or some one can need electrician and this system provides nearest electrician detail using this system the person can

## Sports Details

Well I like to play every sport to keep body healthy but not a big fan of watching any.

I am good in Kabaddi and like to play after a great amount of work.

call them electrician directly without any changes and fulfill their requirement and problems. service provider can first register their service in this website and then user can search them.

- E-Commerce (Website)

In this website can provide online products selling like online store (flipkart, amazon) and user can buy the product what they actually needed or requirements.

- Book Rent Shopee (Website)

In this website can provide buy a book on rent as per they require days to read this book and then return a book after completed the time period of due date.
